A PROUDLY AUSTRALIAN OWNED COMPANY SINCE 1984

## FEATURES

Designed in Australia to exacting standards  
World's best quality components  
Heavy-duty cabinet designed to last a lifetime  
10 year replacement warranty

Top mounted controls for ease of access  
Portable or wall mounted  
Ultrafast heat up time  
Temperature dial marked in degrees C

Economical to run with 100% efficiency  
Cabinet size designed to optimise air intake and dispersion  
Standby power usage less than \$3 per year

One piece aluminium element  
Completely silent  
Perfect for use in bedrooms

Safe front surface temperature  
Safety cutout switches for overheat and tilt  
Lockable childproof control panel cover  
IP24 approval for use in bathrooms

Electronic 7 day timer models with manual override  
Temperature range 5-30°C accurate to +/- 0.1°C  
Time always displayed and programs always retained even when not plugged in to mains power

## WHAT SIZE DO I NEED?

The Polo 'C' series range of panel heaters consists of four different heating capacities and 8 models – four manual 'C' models and four with a 7 day digital timer 'CT' models.

Determining the correct sized heater will ensure optimum performance and economical running. As a rough guide use 100 watts per square metre of floor area (with standard ceiling insulation). For accurate sizing consult your heating dealer.

MODEL C without timer CT with timer	RATING	APPROX RUNNING COST c/kWh Tariff c/kWh			DIMENSIONS WxHxD (mm)	APPROX AREA HEATED	SUGGESTED PLACEMENT
		20	25	30			
C100, CT100	1000 w	10	13	15	545 x 452 x 75	10 m <sup>2</sup>	Bathroom, ensuite, study, small bedroom
C150, CT150	1500 w	15	19	23	700 x 452 x 75	15 m <sup>2</sup>	Medium bedroom, home office
C200, CT200	2000 w	20	25	30	890 x 452 x 75	20 m <sup>2</sup>	Living area, large bedroom
C240, CT240	2400 w	24	30	36	1035 x 452 x 75	24 m <sup>2</sup>	Larger living area, hallway

Note (1) Running cost calculations assume cycling of 50%. Your tariff rate (see your latest power bill) and hourly running costs may be different to the ones stated.

Note (2) Slightly less or greater areas may be covered depending upon ceiling height, window area and coverings, building construction and insulation properties. If in doubt select a higher rated heater, as undersizing will result in higher running costs.

## WALL MOUNTED OR MOBILE

All POLO 'C' series panel heaters are supplied with a metal mounting bracket designed for permanent fixing to a wall and feet with castors for portability.
